DETAILED ACTION

Note:

Claims 8 still recites in the preamble a non-ionizing "low level bio-energy" to provide the phototherapy. Objection of this claim language was addressed in the prior Office Action mailed Nov. 14, 2006.

Claim 18 recites in line 3 the term "said central microprocessor." There is insufficient antecedent basis for this limitation in the claim.

Appropriate corrections are required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-13 are again rejected under 35 U.S.C. 102(b) as being anticipated by Diamantopoulos et al. US Patent No. 4,930,504.

Diamantopoulos et al. disclose a treatment apparatus comprising:

a plurality of light sources including multiple arrays of both visible and invisible light emitting devices;

at least one power source for providing power to said light devices to generate bio-stimulation light beams;

Art Unit: 3735

a control means for controlling the parameters of the bio-stimulating energy, such as the beam power, pulse frequency, and duration; and

a plurality of probes for delivering the bio-stimulating light beams to a treatment site (see Figure 4).

Allowable Subject Matter

Claims 14-20 are allowed.

Response to Arguments

Applicant's arguments filed on May 14, 2007 have been fully considered but they are not persuasive. Although the applicants recognize that the treatment apparatus of Diamantopoulos comprises a cluster probe containing several different light sources, they argue Diamantopoulos fails to teach **multiple arrays** of light sources as recited in the instant claims.

In response to the applicants' argument, Diamantopoulos teaches that "the sources of light or radiation in each of the cluster probes 60 in FIGS. 6-8, showing particular forms of radiation arrays, are semiconductor light emitting devices, e.g., light emitting diodes (LED's)." Diamantopoulos further teaches the cluster probe 60 of his invention "comprises an array 80 of five 660 nm superluminous diodes 166, one 820 nm laser diode 182, ten 880 nm superluminous or laser diodes 188 and five 950 nm superluminous diodes 195." Hence, Diamantopoulos clearly anticipates the recited claim limitations.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed M. Farah whose telephone number is (571) 272-4765. The examiner can normally be reached on Mon, Tue, Thur and Fri between 9:30 AM 7:30 PM. The applicant is invited to contact the Examiner to expedite the prosecution of this application if the applicant is of the opinion that an interview, personal or telephonic, or discussion of the outstanding issues will place the application in condition for allowance.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marmor II Charles can be reached on (571) 272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
